

Cat and Mouse

Cat and Mouse is a 2-player game. We start with a cat and mouse on a 4 x 4 grid, with the cat in square A1 and the mouse in square D1:

The cat and mouse take turns making moves, with the cat going first. Each turn, they can move to any square that's next to the square they're currently in (but not diagonally!).

The cat gets **7 moves** to try to catch the mouse. If the cat catches the mouse by its 7th move, the cat wins. If the cat hasn't caught the mouse by its 7th move, the mouse wins.

Do you think it's better to be the cat or the mouse?
