

In each square in the table, write the smallest positive number you can get to for the given pair of jumps.

If you have any predictions you're very confident about, you can write them in without testing them.

											
		1	2	3	4	5	6	7	8	9	10
	1										
	2										
	3										
	4										
	5										
	6										
	7										
	8										
	9										
	10
